1 Keep it simple

First chapter classes, attributes, properties, inheritance MRO?

Is it true that this is a class?
classPackage : pass

Yes,
because it defines a class called Package,
representing a package

Is it true that this is an atom?
()

No,
because () is just a list.^a

^aread the preface

1 Keep it simple

2 Imitating others

Special methods, inheritance maybe ABC chapter 2

2 *Imitating others*

3 Go and decorate

Class decorators, ABCs

3 Go and decorate

4 Classes of classes of classes...

Metaclasses, Descriptors, MRO?
